

# Atennea Transfer

The management software that streamlines the ground passengers transportation

**Atennea Transfer** is the software that allows your ground passengers transportation company to carry on all operational and financial management in a single and modular system.

This is an advanced and comprehensive management software that benefits from Quonext's experience (more than 20 years) providing solutions to this industry companies.

**Atennea Transfer** integrates into a single solution the company's main operational and administrative areas, using single data throughout the entire system.

Built on the basis of the well-known Microsoft Dynamics NAV ERP system, **Atennea Transfer** stands out for covering the wide range of the ground passenger transportation industry peculiarities. Moreover, it is easily adapted to each company particularities

## Which modules are included in Atennea Transfer?

### Vehicles

This **Atennea Transfer** module keeps record of the information related to your company's vehicle fleet, including:

- Maintenance and Safety checks
- Repair works
- Fuel consumption
- Traffic fines

A spare parts warehouse management is also enabled, integrating its valuation in financial management.

### Services

Features included in this module enable the management of four kinds of services requests, each one of them with a customized treatment to meet the needs of:

- Individual Services
- Group Services (incentives and congress)
- Regular Services (school)
- Shuttle Services (low cost airport transfers)

Integration of services through XML files is allowed. The module is also linked to LOGISPLAN, a third-party software which optimizes routes calculation in order to improve the use of resources (vehicles and drivers).

### Drivers

This **Atennea Transfer** module provides a hiring file history, allowing multiple types of contract and agreements between the company and drivers definition.

Conditions affecting variable incomes, in drivers or general level, can be also created and maintained.

The program also enables each driver work orders allocation with automatic consolidation and, if required, manually adjusting them.

### Hiring

**Atennea Transfer** includes a comprehensive agencies / tour operators hiring module. All services rates can be quickly and easily defined, a feature that is also applied to supplements based on the company needs.

### Invoicing

Your company invoicing is streamlined with **Atennea Transfer**, by means of its multiple possibilities of information grouping and detail. Automatic and regular invoicing is also provided, as well as the customers invoicing to themselves management control.

### Shuttle

This **Atennea Transfer** module enables the best calculation related to Shuttle services reservation requests organization, taking into account parameters such as:

- Flight schedule
- Distance between hotels
- Destination areas

### Cost Control

**Atennea Transfer** provides a comprehensive suppliers outsourcing module, which includes added vehicles control and reflects all agreed conditions. Invoices with information generated by the program can be verified, and also generate suppliers self-invoices.

## Statistics

Calculated fields technology in Microsoft Dynamics NAV provides **Atenea Transfer** with agile statistics, which can be drilled-down from Total amounts until the information source for customers, vehicles and drivers.

### Which are the benefits?

Users can benefit from the multiple advantages related to **Atenea Transfer**, a solution becoming the most suitable ERP management software for ground passengers' transportation. Some of these benefits are:
